Education

IIIT Hyderabad

2023 – 2027 (ongoing)

B.Tech in Computer Science Engineering — GPA: 7.58/10

Hyderabad, India

- **Key Courses:** Computer Systems Organization, Data Structures and Algorithms, Computer Programming, Data and Applications, Operating Systems and Networks, Design & Analysis of Software Systems, Statistical Methods in AI, Machine, Data and Learning.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, Shell Scripting, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, React Native, Next.js, Node.js, Tailwind CSS, Flask, NumPy, PyTorch

Databases & Tools: MongoDB, MySQL, PostgreSQL, Kafka, Jenkins, Kubernetes, Git, n8n, RAG

Experience

Intern at Chubb

June 2026 – July 2026

Software Development Engineering Summer Intern

- Modernized the legacy "Third Party" Java application to a springboot microservice deploying on Azure Kubernetes Service (AKS).
- Reduced manual release effort by building an automated CI/CD pipeline in Jenkins, streamlining build, test, and deployment stages for the modernized service.
- Improved inter-service data flow reliability by configuring dynaflow to orchestrate pipeline build .

Student Alumni Connect Cell

2026 – Present

Head of Logistics

- Manage comprehensive logistics for events, facilitating talks and networking sessions between startup founders and the student body.

Zigsaw — Live Link

2026

Collaborator under Vaibhav Chouhan

- Architected a Retrieval-Augmented Generation (RAG) pipeline to automate candidate screening, filtering large datasets to identify top talent.
- Utilized Semantic Search with vector embeddings to efficiently retrieve the top 100 relevant resumes based on job description similarity.
- Implemented an LLM-based Listwise Reranking agent to analyze candidate nuances and refine the selection to the top 10 high-quality matches.

BoardGameiac

2025

Software Developer Intern under Kartik Sanghavi

- Developed a full-stack web application, implementing the frontend, admin page, backend APIs, and user permission controls.
- Deployed and managed the application on AWS, utilizing an EC2 instance for the server and RDS for the PostgreSQL database.
- Integrated the application directly with the Pet Pooja app.

Future Leaders

2024

Software Developer Intern under Aparna Renganathan

- Designed frontend (admin page, feed, gamification) and implemented backend APIs with database schema for user management and content delivery.

Projects

Autonomous Target-Chasing Drone — *Project Lead under Harikumar Kandath — ROS2, Gazebo, RL*

- Leading a team to build a drone with LiDAR, camera, and radar to autonomously track and chase a target drone, using a ROS2/Gazebo simulation environment with a two-drone setup.
- Implemented vision-based target detection and a Reinforcement Learning (RL) based pursuit policy to autonomously chase a moving target drone.
- Managing project logistics, component integration, and system planning.

Transformer Model from Scratch — *Python, NumPy, PyTorch*

- Implemented multi-head self-attention, positional encoding, and layer normalization modules from first principles to build an encoder-decoder Transformer.
- Built a custom automatic differentiation engine and training loop, validating gradient correctness and convergence on a sequence-to-sequence task.

Network File System (NFS) — *C, Networking, Concurrency, Git*

- Developed a scalable, fault-tolerant distributed file system supporting file and metadata operations.
- Implemented concurrency control (exclusive access), Tries, mutex locks, LRU caching, async writes, logging, and real-time audio streaming.

Custom Unix-like Shell — *C, POSIX API, Shell Scripting*

- Developed a shell supporting built-in commands, aliases, I/O redirection, background/foreground processes, and fetching man pages online.

Portfolio Website — *Live Link — HTML, CSS, JavaScript*

- Built a personal portfolio website to showcase projects and technical skills.

Awards and Achievements

- JEE Mains (AIR 426) — JEE Advanced (AIR 2717) — STSE 10th (Rank 95) — STSE 12th (Rank 8)
- Dean's List 1 (Spring 2026)
